Dyno Nobel is Awarded Union Pacific's Pinnacle Award

The Institute of Makers of Explosives (IME) is proud to acknowledge one of its members, Dyno Nobel, as a recipient of the Union Pacific's distinguished 2015 Pinnacle Award. This award recognizes Dyno Nobel's commitment to transporting chemicals safely and securely. Dyno Nobel was one of 65 companies vying for the award, and a standout as an explosives company.

Dyno Nobel received this award not only because there were no incidents or violations but because of the successful implementation of preventative safety measures, incident investigation and corrective plans.

IME extend our congratulations to Dyno Nobel and all those involved in safely and securely transporting chemicals.

The mission of IME is to promote safety and security and the protection of employees, users, the public and the environment and encourage the adoption of uniform rules and regulations in the manufacture, transportation, storage, handling, use and disposal of explosive materials. For more information about IME and its safety and security standards, please go to the IME website (www.ime.org).
